Education & Training

Open University (2013 - 2016)

BSc Open Degree - **Software Development**

Skills

Programming & Automation

(Go, Python, NodeJS, Rust, Java)

GCP & AWS

Serverless & Microservices Software Architecture

Linux Servers & Infrastructure

Redhat, Ubuntu, Suse

CI/CD, Docker, Kubernetes, Data Engineering

Web Technologies &

Frameworks (Javascript, Flask, Django, HTML, CSS)

Open Telemetry & Prometheus

An experienced Software Engineer with a technical scope including but not limited to, BigData, Automation, DevOps and Cloud Infrastructure.

Experience

Daidokoro - Director & Engineer

London, UK - July 2019 - Present

Primarily serve as a Contractor, Consultant, or Freelance Engineer, specializing in the development and delivery of innovative technical solutions, consistently ensuring optimal performance and reliability

Coralogix - Customer DevOps Engineer

London, UK - December 2022 - Present

www.coralogix.com

- Collaborate with Coralogix clients to engineer bespoke data collection engines and pipelines that focus on logs, metrics, and application traces.
- Streamline integrations between Coralogix and client platforms, ensuring optimal data flow and interaction.
- Proactively research, innovate and build tailored solutions to facilitate integration in scenarios where standard methods are insufficient or unavailable.
- Specialize in the analysis and diagnosis of complex platform and integration issues.
- Instrument various applications for traces and metrics. Go, Python, NodeJS.

Nahuru - Head Of Engineering

London, UK - July 2017 - July 2019

www.nahuru.com

- Developed a global platform for tracking and reporting P2P download data
- Designed a redundant multi-cloud application using Golang, AWS, and Google Cloud.
- Created efficient data pipelines for BigData ETL tasks.
- Coordinated with external developers and freelancers on various projects.

Cloudreach - Cloud Systems Engineer

London, UK - July 2016 - July 2017

www.cloudreach.com

- Building, Automating, Deploying & Managing infrastructure on AWS (Go & Python)
- Consulting on various Application and Infrastructure migration Projects.
- Training/Up-skilling Internal and External Cloudreach customers on various technologies relating to DevOps and AWS.
